A close-up photograph of a bronze Buddhist mask, likely a Kumbhakarasiṃha or similar deity. The mask features multiple faces, with the central face having a serene expression and closed eyes. The mask is set against a blurred background of warm, glowing lights, creating a bokeh effect. The lighting highlights the texture and details of the bronze.

11 Years In: Why Are Bitcoin Exchange Outages Still Occurring, And Is There an Answer?

cryptonewspipe.com

Mon May 11 2020

"This is not the first time Bitcoin has gone down & it surely will not be the last." The Silver Lining: Rising Bitcoin Demand Many noted that outages in Coinbase could have occurred due to market makers (MM), which are individual market participants or member firms that keep exchanges liquid.
